> [Image: A book placed symmetrically on a wood grain table. Depicted on the cover is shirtless man leaning sensually on a post. A large minimalist text displays the title *'William S. Burroughs — Queer'.*]

Queer by William Burroughs

Written as a semi-autobiographical account of Burrough's time in Mexico, this tells the drugged-up story of the intensity of yearning and sexuality while simultaneously exposing the profound despair and loneliness of its main character, Lee (Burroughs).

I find myself less drawn to the sensationalist aspects of the book (less so than that of his writing in Junkie) and more so relating to Lee being the Loneliest Man on Earth, regardless of how much hot, gay sex he is having.

Notes from Underground by Fyodor Dostoyevsky

“I am a sick man. ... I am a spiteful man. I am an unattractive man.” The novel opens with these lines and continues on a drunken rant about the horrible state of the narrator’s liver and how he is above medicine.

Most of the book goes on exactly like this, rambling and introspective stories on the narrator's ego, humiliation, and completely rotten state. You are never endeared to this man at any point throughout the whole story. He pollutes the text with his sorry hatred and complete lack of self-awareness. Despite this, I was not able to put down the book once I started reading it. Why?

Milk Fed by Melissa Broder

Recommended by a friend. To say this is a queer love story is misleading. There is no love in this. Only pain, hurt, more pain, and it never resolves. Well, it does kinda but it's not the resolution the character needed. I'm happy for her because her relationship with food improved. Yes, but, I cannot be THAT happy since she sees the love of her life with another man. And pregnant by him. What the fuck is that ending? I don't want to call it a bury-your-gays book because nobody actually dies, but, when will queer romance actually start ending happily? This is A Little Life all over again but for lesbians.

this is the first bad take i've ever seen from you. i used to really love your book reviews but this one leaves me questioning if you really had taste to begin with. it's so obvious that you didn't read past the tragic romance aspect and chose to ignore the complex themes of eating disorders and mommy issues. my guess is this hits too close to home and that's why you didn't like it.
